

## Dynasty Filtration

### Nylon Melt Blown Filter Cartridges

#### Typical Applications

#### **Filtration of High Temperature Aromatics Paint Filtration**

The Dynasty Filtration Nylon Melt Blown Filter is ideal for the removal of solids from organic chemicals, such as Benzene, Xylene, Toluene, etc. The coreless filter cartridge is easy to dispose of by incineration reducing the cost over landfill disposal. Nylon melt blown filter are also ideal for paints as well. The remove only the unwanted solids leaving the paint pigments behind.

Maximum Temperature: 300° F

Maximum Differential Pressure: 50 PSID

End Configuration: Only Double Open Ends Are Available At This Time

Materials of Construction: 100% Nylon

Outside Diameter: 2.5 "

Lengths: 5" through 40"

1020 South 1<sup>st</sup> Street, Suite T

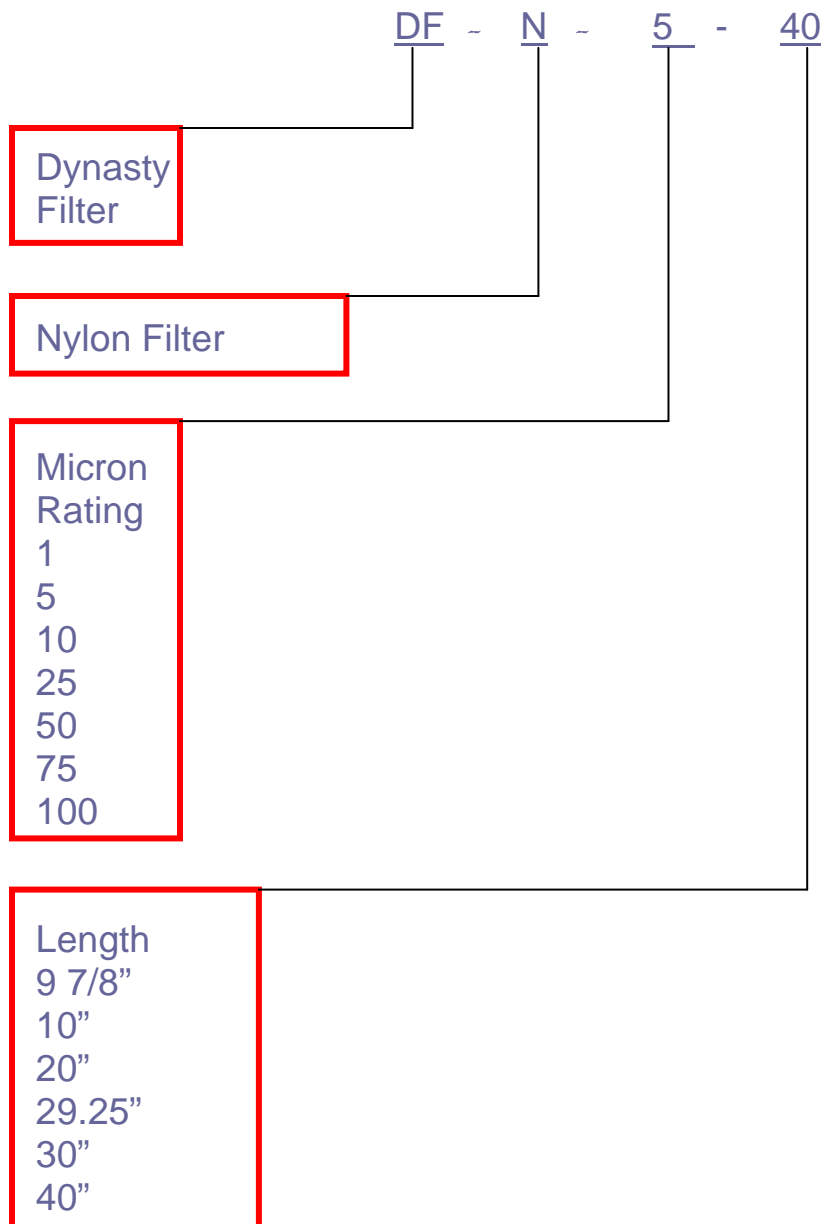

LaPorte, TX 77571
