

Dynasty Filtration

Polyester Melt Blown Filter Cartridges

Typical Applications

Filtration of High Temperature Fluids

Paint Filtration

Acid Solutions

Edible and Petroleum Oils

Food and Beverage

The Dynasty Filtration Polyester Melt Blown Filter is ideal for the removal of solids from high temperature fluids. The filter cartridge is easy to dispose of by incineration reducing the cost over landfill disposal. Polyester melt blown filter are also ideal for paint, acids, and oils. They remove only the unwanted solids leaving the paint pigments behind.

Maximum Temperature: 300° F

Maximum Differential Pressure: 60 PSID

End Configuration: 222, 226, Closed End, Bayonet, Extended Core, Gasketed Ends, and Double Open End

Materials of Construction: 100% Polyester

Outside Diameter: 2.5"

Lengths: 5" through 40"

123 South 16th Street
